SUMMARY

My experience combines a strong foundation in machine learning and deep learning concepts with hands-on work in building end-to-end AI and data-driven applications. I am comfortable working on real-world projects including LLMs, NLP, Distributed AI systems, with a passion for learning Emerging Technologies and Developing impactful solutions.

EDUCATION

Ramakrishna Mission Vivekananda Educational and Research Institute (RKMVERI)

MSc in Data Science and Artificial Intelligence, 2025–27

CGPA –7.83(till Sem-1)

Ramakrishna Mission Residential College(Autonomous),Narendrapur 2022-2025

BSc (Honours) in Mathematics

CGPA –8.4

Marishda B.K.J Banipith 2016–2022

Secondary–95.85%

Higher Secondary–97.8%

EXPERIENCE

Summer Internship

IEST,Shibpur

May 2026 – July 2026

Developed an LLM-based automated grading system for long-form student answers using QLoRA fine-tuning of Qwen2.5-3B-Instruct with rubric-based criterion scoring. Built the complete pipeline covering dataset preparation, model fine-tuning, baseline comparison, and evaluation on held-out and external test sets.

Centre of Excellence On Data Science and ML

Govt. of WB, Webel

Aug 2026 – present

Developing a Bengali-specific LLM capable of absorbing regional dialects and linguistic variations, with a focus on challenging dataset preparation and curation, token augmentation, and model integration for efficient vocabulary expansion, followed by continual pre-training, instruction Tuning, alignment and Deployment for efficient downstream task.

SKILLS

- Languages:** Python, R Programming, LaTeX
- Frameworks:** OpenCV, Scikit-Learn, NumPy, Pandas, Streamlit, PyTorch, Matplotlib
- Operating Systems:** Windows, Ubuntu Linux
- Tools:** GitHub, Google Collab, Jupyter Notebook

COURSE WORK

- Machine Learning, Deep Learning, LLM, Emerging Technologies
- Probability and Statistics, Linear Algebra, Time Series Analysis
- Distributed Computing, Data Structures and Algorithms

ACHIEVEMENTS

- DST INSPIRE Scholar(Top 1% of Board performers, Govt. of INDIA), State Rank-10
- Qualified GATE-DA(2026)
- AIR-667(JAM-Mathematics/2025)

PROJECTS

A Deep Learning Approach to prevent road accidents detecting Drivers' Drowsiness

RKMVERI

Feb 2026 – Apr 2026

Developed a vision-based driver monitoring system using CNN, VGG16, CNN+LSTM, CNN+BiLSTM architectures on DDD Dataset. Implemented person-wise data splitting and temporal sequence modelling for robust evaluation, achieving best performance with CNN+LSTM(75.53% test accuracy and 0.847 ROC-AUC)

A Machine Learning Approach to Revenue Prediction and Quintessential Feature selection

RKMVERI

Oct 2025– Dec 2025

Developed a machine learning pipeline for transport depot(S.B.S.T.C,Digha, Govt. of WB) Daily revenue prediction using 2023-24 operational data(real Data set from Digha Depot). Compared regression, tree-based, and boosting models with multiple categorical encoding techniques, achieving the best performance with CatBoost, and identified conductor, departure time, and route as key revenue-influencing features.

Distributed QSA Using KAFKA

RKMVERI

Feb 2026 – Apr 2026

Designed and implemented a distributed question-answering system using Apache KAFKA, where user queries are automatically classified into domain-specific topics (Mathematics, Physics, and Biology) using an LLM-based router. Built a producer-consumer architecture with Kafka topics and consumer groups, where specialized LLM services process domain-specific questions in parallel and return generated responses to a central server.

HIPAA Compliant Clinical Decision Support System

RKMVERI-Term Project

Aug 2026 - present

Developing a HIPAA-compliant Clinical Decision Support System (CDSS) that integrates LLMs with secure clinical data access and PHI protection. The project focuses on role-based/attribute-based access control, PHI de-identification, policy-aware LLM interaction, and audit logging to support privacy-preserving clinical decision support.
